Misr University for Science and Technology

About the University

Misr University for Science & Technology (MUST) is the first private university established in Egypt with nearly 20,000+ students. Since 1996, MUST has been recognized for effectiveness and notability of its academic programs as well as the success of its sustainability efforts. Must is well known for its dedication to excellence. MUST is a nationally recognized technological university administrating a remarkable process of education and securing a highly-ranked research environment and scholarships in various fields. MUST enjoys full legal recognition by all educational authorities In Egypt and is authorized to grant B.A, B.S, M.A, M.S, and Ph.D. degrees in different fields of study. All our programs at MUST have been accredited by the Supreme Council of Universities in Egypt. MUST is an active member of the Association of Arab universities, the International Association of university Presidents and the Association of African Universities.

University Mission

Our mission is to facilitate the learning process of our youth to achieve excellence on social, educational and professional levels. The university aims at altering the lives of its students and contributing to the process of education in society as a whole, creating knowledge and, more importantly, seeking distinction. We share the belief that the students' social and educational enhancement emerges when they apply their knowledge. We are committed to delivering the best education experience through expanding imagination of the students, cultivating lifelong learning, and promoting respect for diversity. At MUST, we provide access to higher education opportunities that enable students to acquire the knowledge and skills needed for the actual job market. We strive to enhance youth capabilities through our distinguished learning environment.

University Vision

Our vision is to be a leading international institution and to maintain our prominent position in research and education, where all of our students have the opportunity to reach their full potential and to participate in and contribute to all aspects of life. Aiming for excellence in its field, MUST was a strong and self-motivated institute that grew to become a unique institution and to bridge the gap in the field of higher education in Egypt. It aspires to expand in the future throughout the Middle East. We strive to ensure that each student meets the needs of different societies through the use of technology and innovation. At MUST, we provide students with an exceptional educational experience to help them reach their chosen careers. Our modern curricula guide students towards a well-planned future and prepare them to lead successful lives full of achievements.

Introduction

Dear students of Misr University for Science and Technology,,,

The university student's knowledge of the systems and regulations governing the educational process within the college is one of the means that help him pass his academic years without problems or obstacles. Therefore, academic advising is an essential axis of the educational process and is a prerequisite for the quality of education, as it is a cooperative process between academic advisors and students, where we strive towards a clear goal, which is to Prepare students adapted to the academic system, educate them about the university system, and help them overcome difficulties that may lead to their late graduation. Therefore, the academic advising system aims to provide advice and help students face various difficulties related to university life and help them understand their problems and work hard to solve them, to raise a generation of young people who carry science, knowledge and decision-making ability.

Therefore, on your academic journey, we are pleased to present this guide to you, as the guide is an important source of information about study pathways, graduation requirements, and how to determine the majors that suit your interests. With the help of the Academic Advising Guide, you will gain a deeper understanding of the credit hour system and benefit from guidance that contributes to your academic success and personal development. In short, the Academic Advising Center is your partner in building your academic and professional future successfully.

The University Academic Advising Center

Prof. Nehad El-Mahboub

President of the University

Chairman of Academic Advising Center

University Academic Advising Center

In accordance with the Universities Organization Law No. (101) of 1994 and its executive regulations and the amended and complementary laws and decisions, including Presidential Decree No. (245) of 1996 regarding the establishment of Misr University for Science and Technology. In accordance with Law No. (49) of 1972 on the organization of universities and its amendments and executive regulations; and based on the strategic plan of the university, and the belief of Misr University for Science and Technology that the university student's knowledge of the rules and regulations governing the educational process is one of the means that help him to pass his academic years without problems or obstacles; together with its belief that academic guidance is an essential axis of the educational process and is a basic requirement of the quality of education, to raise a generation of young people who carry science, knowledge, and decision-making, a decision was issued by His Excellency the Chairman of the Board of Trustees of the University No. (19) for the year 2023 on April 19, 2023 to establish the Academic Advising Center at Misr University for Science and Technology.

The academic advising process is a collaborative process between academic advisors and students. Therefore, the Academic Advising Center at Misr University for Science and Technology aims to provide advice and help students face various difficulties related to university life, prepare them to adapt to the academic system, educate them about the university system, and help them understand their problems and work hard to solve them, to raise a generation of young people who carry science, knowledge, and decision-making ability. The center also aims to develop the capabilities of academic advisors at the university and increase their awareness of the process of Academic advising.

Academic Advising

Academic advising is the process of mentoring students in educational institutions, to effectively achieve their academic and professional goals. Academic advising includes providing advice and guidance to students on various matters related to their academic stages, choosing majors and courses, personal and professional academic plans, and solving problems they face in university life.

Academic Advising Center Vision

To be a center of distinction and pioneering nature in following up students' problems and providing academic advising services that meet all the needs of university students.

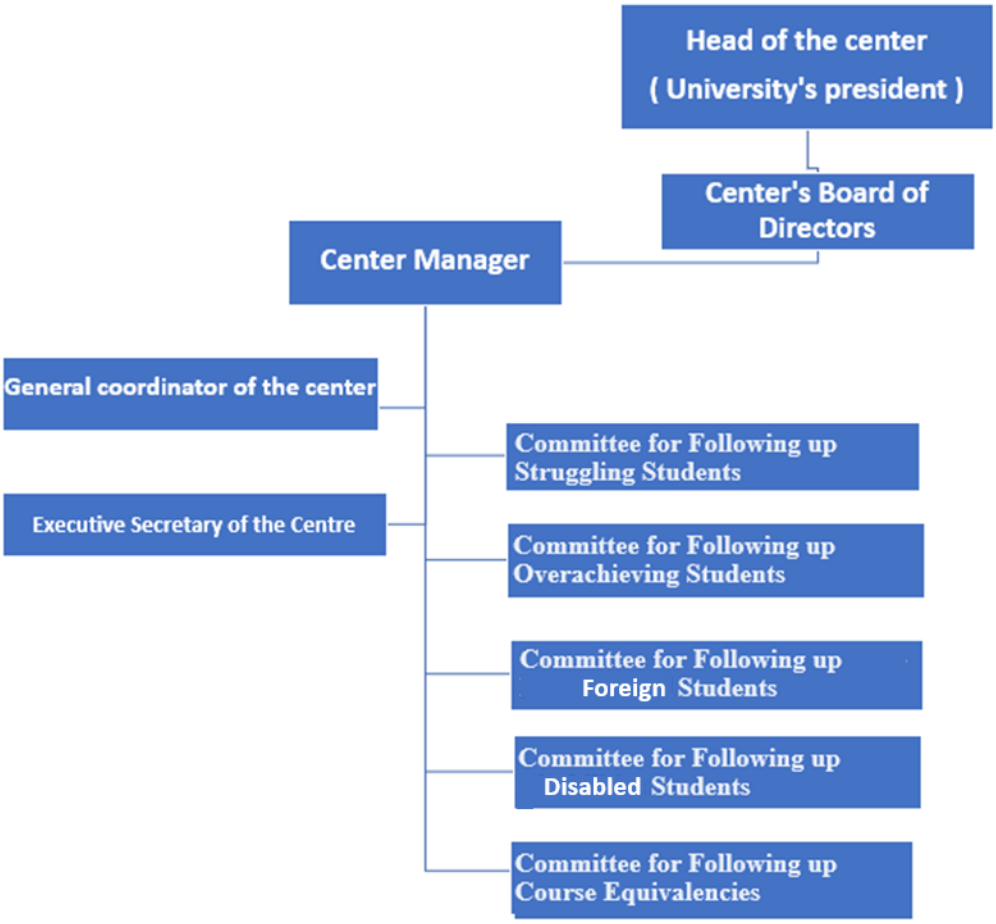
Academic Advising Center Mission

We strive to create an advanced academic environment that effectively facilitates the educational process, scientific assistance, and social and behavioral guidance for all university students to develop their personalities and professional interests, help them excel and innovate, and enhance the students' identities through planning, coordination, and regularly supervising all educational processes for students.

Objectives of the Academic Advising Center

1. Developing, and following up academic advising policies with the academic advising committees in colleges.
2. Spreading the culture of academic advising among faculty members and students and activating the benefit of its services.
3. Preparing new students to get introduced to university life and the study system through orientation counseling programs.
4. Developing the capabilities of academic advisors and increasing their awareness of academic advising.
5. Supervising the application of academic advising and student support procedures and instructions in colleges and following up their implementation.
6. Providing students with suggestions and advice to enhance their educational achievement and help them overcome their academic and administrative problems.
7. Overcoming obstacles that hinder the educational achievement of struggling students.
8. Working to strengthen the relationship between students and faculty members and build social relations for the student with his colleagues.
9. Studying the negative behavioral phenomena of some students and working to find appropriate solutions to them.
10. Caring for outstanding students, guiding them, and helping them to pursue excellence.
11. Caring for gifted students and supporting their creativity.
12. Helping graduating students and preparing them for practical life so that they can meet the requirements of the job market and community needs.
13. Urging students to adhere to the morals and civilized behavior of the university student and to possess the needed qualities when dealing with his professors and colleagues.

Organizational Structure of the Academic Advising Center



Contact info:

E-mail	Office
academic.advising@must.edu.eg	123

Important terms

President of the University	The person who holds the highest administrative position in the university and leads and manages it. The President is primarily responsible for making important administrative and academic decisions that affect the University and its people. The President is usually responsible for directing and implementing academic and administrative policies, enhancing academic quality, and developing educational and research programs. He manages the financial and human resources and infrastructure of the university and collaborates with the academic and administrative staff to ensure that the University's goals and vision are achieved.
Vice President for Education and Student Affairs	A senior official in the University's organizational structure and is considered part of the University's senior management. This position is appointed to focus on improving the quality of education at the university and providing the necessary support to students.
Dean of the College	The person who has the authority that allows him to carry out many administrative and academic tasks, and the task assigned to him is to supervise the affairs of the academic institution. The dean of the college has executive powers in the institution whose deanship he heads and supervises its programs and the quality of education in it.
Vice Dean for Education and Student Affairs	The main college officer for student affairs and education. This position plays an important role in the development and implementation of policies and procedures that affect students' academic lives and student affairs. The Vice Dean for Education and Student Affairs promotes an encouraging and supportive learning environment for students and works to provide academic support, advising, and counseling to students. He also collaborates with faculty and college administration to develop and implement innovative academic and educational programs and ensure their quality.
Head of Department	The person responsible for managing the scientific department in the college. He works to develop and improve the study and training programs of the department, follows up with faculty members and employees in the department, and organizes their work.
Academic Advisor	The faculty member who is chosen by the college or department to guide students on their academic path at the university. He helps them choose semester courses and overcome obstacles that may affect their achievement, as well as guide them on how to adhere to the university's regulations and policies.

Course	A subject included in the student's study plan that has a name, code, and number of teaching hours according to the regulation. It determines the topics that must be learned and the skills to be acquired for achieving goals.
General University Requirements	The courses taken by all university students in all disciplines.
Compulsory Courses	Subjects that are predetermined by the educational institution offering the program, which students must complete and pass to obtain the university degree or academic qualification to be obtained. These courses typically include the core subjects that the program considers necessary to equip students with the knowledge and skills necessary to pursue the chosen major.
Program Elective Courses	Courses are courses that students can freely choose from a range of courses available within a specific program of study. These courses are usually objective and related to the student's specialization or topics that benefit and enrich his academic and practical experience. t ive courses give students the freedom to choose and control their course of study and enable them to tailor their studies to their personal and professional interests and needs.
General Electives	Courses that the student chooses to study in programs other than the one he joined, and they provide general knowledge for the student away from his specialization.
Prerequisite	A course or set of courses that the student must have studied and successfully passed before he can register for the subsequent course.
Credit Hours	A study system that depends on the system of hours and courses and not years of study. The credit hour is the unit in which the courses are measured. The credit hour is 50 minutes and not 60 minutes, and semester is equal to 3 hours per week and is doubled in the summer semester.
Academic ID	A number assigned to each student at the university, and is usually used to identify the students and track their academic and financial records. The academic number can be used to identify the semesters in which the student has registered, the courses he has studied, the grades obtained in each course, as well as tracking the date of tuition fee payment. The academic number is usually considered sensitive information whose confidentiality must be protected and ensured.
Study Level	The stage of study in which the student is in accordance with the approved study plan.

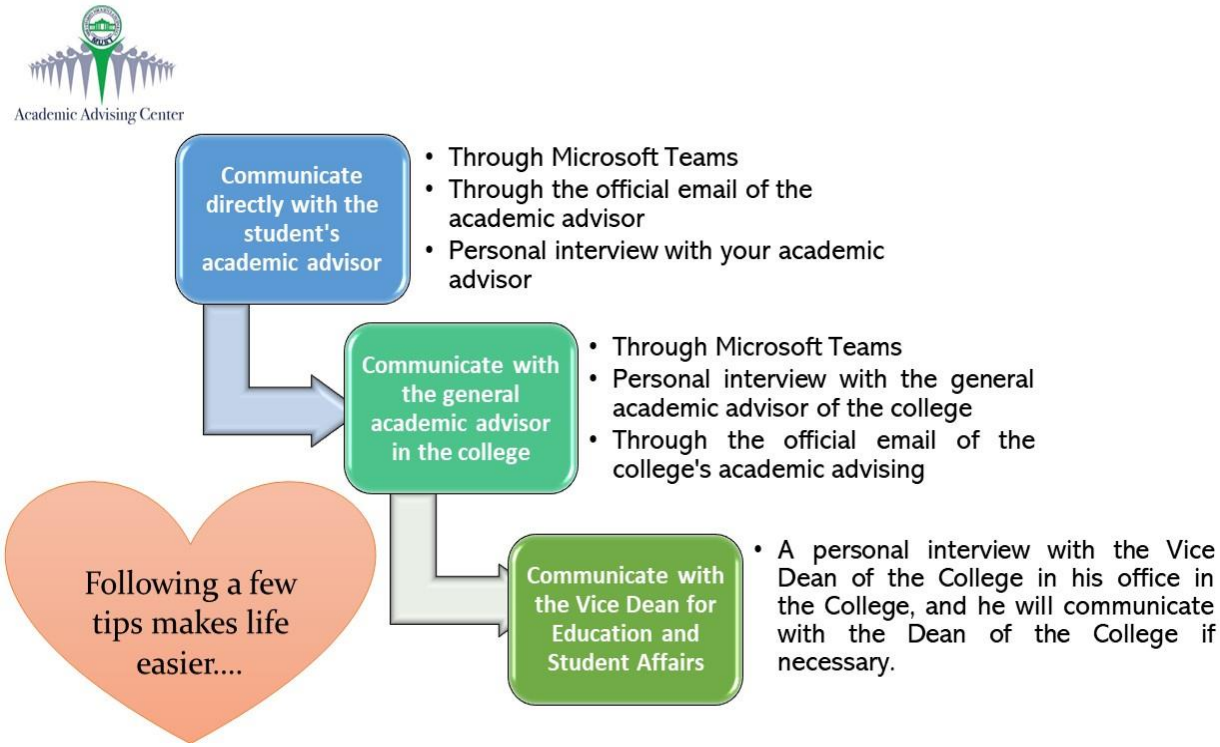
Semester average	The unit of measurement of a student's academic level in one semester.
GPA	The unit of measurement of the student's academic level in all the semesters he studied. It is the total number of points obtained by the student in all the courses that he studied according to the study plan since joining the university divided by the total number of credits of those courses. GPA = Total (Course Points * Number of Course Credit Hours) / Total Credit Hours
Academic Year	The period that the academic program takes in the educational institution, and it usually consists of several semesters: two basic semesters, the fall and spring semesters, and an exceptional semester, the summer semester, where academic subjects are taught and students are evaluated during this period. The duration of the academic year and the number of semesters vary from one institution to another and from one program to another. The fall and spring semesters take 15 weeks, and the summer semester to a maximum of 7 weeks.
Study Plan	The document that specifies the academic requirements that a student must complete to obtain a bachelor's degree or other higher academic degrees. The student's study plan includes all the requirements of the academic program, including the number of credit hours and compulsory and optional course requirements. The study plan also specifies the dates for student registration and deadlines for adding or dropping courses. The study plan for the university student aims to guide him in choosing subjects and determining his requirements in a proper academic way and helps ensure that he acquires the knowledge and skills necessary to achieve his academic and professional goals.
Early Registration (Plan ahead)	The early course registration before the beginning of the registration period for each semester, so that the student can create a study schedule through the program plan in which he is enrolled, in coordination with the student's academic advisor to help him choose the suitable courses.
Drop/Add Period	The period in which the student may drop or add some courses within the study plan in a manner that does not conflict with the minimum and maximum academic load. Its dates are announced at the beginning of each semester before the registration of courses.

Academic Withdrawal	A formal process available to students who are facing events beyond their control that affect their ability to perform academically. This can include, but is not limited to, a major medical problem, or the death of a first-degree family member. If approved, academic withdrawal replaces all grades in a semester assigned with (W). The student can request academic withdrawal after the add/drop period. The student can also withdraw from one or several courses in the semester, provided that the number of hours registered in the student's schedule after withdrawal is not less than 12 credit hours.
Academic Load	The total study hours that the student is allowed to register in the semester. The maximum and minimum academic load are determined by the executive rules of the university.
Minimum academic load	The number of study hours that the student registers during the academic level with no less than 12 hours of study for the semester system and 20 hours of study for the annual system.
Maximum academic load	The number of study hours that the student registers during the academic level, not exceeding 23 hours of study for the semester system and 40 hours of study for the annual system.
Incomplete grade	Recorded for the student in his grade record (I) if he does not complete the requirements of a course on time, such as his excuse for entering the exam for an acceptable reason.
Student Transcript	The official record of the grades obtained by the student at the university, the cumulative average of the student, the total number of hours that the student has completed his studies, as well as the total points he collected.
Banner System	It is a comprehensive student data management system widely used in universities and colleges around the world. The banner system provides multiple functions for students by entering the academic number and password of the student, where the student can register for courses, drop, add, and follow up his semester grades and study schedule. The banner system automatically updates the data, quarterly and cumulative averages.
Regular Student	The student who attends all lectures and practical lessons, and his attendance rate is not less than 75% during the semester.
Discontinuous student	A student is called a discontinuous student if he does not register in a semester, or withdraws from the semester, whether with or without an excuse. The student may drop two consecutive semesters or three non-consecutive semesters as a maximum. He is dismissed from the university in case of a longer period of interruption without an excuse

	accepted by the College Council and approved by the President of the University. The student can be allowed to drop out during several semesters upon the approval of the University Council.
Underachieving Student	An underachieving student is a student who gets a lower grade than in the previous year, a student who is late academically, or a student who has a cumulative average of less than 2.00 after a full academic year and who faces difficulties or problems in the educational process as a result of circumstances related to the level of understanding and concentration or psychological, social or material conditions and is followed up by the responsible academic advisor.
Overachieving Student	A student who excels academically and needs special care and distinguished counseling services to maintain his academic level.
Academic Warning	The notice given to the student if his cumulative average falls below 2, and if the student obtains a cumulative average of less than 2 for three consecutive semesters. In this case, the student becomes subject to dismissal from the university.
E-Learning Platform (Smart learning)	An educational platform that allows students at the university to access online course content and educational resources. This includes recorded lectures, e-textbooks, online quizzes, and assignments. This platform promotes distant learning and enables students to organize their time and communicate with professors and other students online. https://smartlearning.must.edu.eg/
Microsoft Teams	An online collaboration and communication application used in distant education. It allows students to attend live lessons, exchange educational resources, and communicate with professors and colleagues. It contributes to providing an effective and flexible learning experience and facilitating access to resources and communication in real-time.
Service Desk Plus	The University's Information Technology Service Management program that provides effective and structured support to students and staff regarding technical problems and service requests. Through it, a request or complaint can be sent and answered by the specialist, such as technical problems associated with university e-mail, or a problem related to academic advising, ...etc. https://support.must.edu.eg/
Muster application	An application for university students to make the frequently required data easier to access and retrieve such as registering for courses, dropping, adding, and withdrawing from courses. Also, it helps the student view the study schedule anytime and anywhere.

Academic Advising Center

Steps The Student Must Follow in Case of Facing an Issue Related to Academic Advising



Academic Advising Axes
The axes of academic advising are:

1. The student

The importance of the student in the academic process is that he is its axis. In the absence of structured and targeted academic advising, the student is solely responsible for familiarizing himself with the university systems and regulations. Due to the varying levels of achievement and experience among students, some find it difficult to understand and apply these systems and regulations, leading to academic problems such as poor performance, repetition of courses, failure, and dismissal. The student bears full responsibility for these problems due to his inability to understand these systems and the ineffectiveness of the academic advising system.

Responsibility and role of the student

- The student is primarily responsible for his academic performance, and the role of the mentor is the process of guiding the student and helping him to overcome the difficulties and problems that he may face.
- Reviewing the study regulations and understanding the credit hour system.
- Knowing the calendar for the academic year and viewing it each semester.
- Communicating with the academic advisor and taking advice in case of stumbling or inquiring about the study or university life.
- Commitment to meeting with the academic advisor on the date specified by the academic advisor for each student, and to inform him of all the information and data requested from him.
- Implementing the mentor's recommendations and attending the mentor's meeting according to the arranged dates.
- Informing the advisor of any variables that may affect his program or academic performance.
- The need for the student to follow the official means of communication (Microsoft Teams - e-learning platform - university e-mail) daily.

2. The Educational Institution: It is represented by

First: Academic Advisor

The college member assigned by the department or college to support the student and help him make sound decisions during his academic career successfully and effectively.

Tasks of the Academic Advisor

- Obtaining a list of his students from the Office of the Academic Advising Unit at the college.
- Meeting with students, to introduce himself and get to know them, and breaking the barrier of dread between the students and himself.
- Introducing the student to the administrative and organizational structure of the college, the services provided in the college, and his rights and duties.
- Introducing students to the policies of attendance, absence, warning, deprivation, and postponement of a semester.
- Explaining the registration system for students and the policies for dropping, adding, and withdrawing from courses.
- He informs his students about the tasks of academic advising and the rights and duties of students.
- Showing them the pros and advantages of the academic advising system.
- Announcing to students his counseling hours and explaining to them the importance of communicating with him.
- Introducing students to the study system (courses/credit hours).
- Helping the student in solving his academic problems first-hand.
- Knowing the calendar of the academic year and presenting it to students, especially the dates of registration, deletion, addition, and withdrawal from courses.
- Encouraging students to participate in student activities in the college.
- Implementing awareness programs by holding seminars and workshops in cooperation with student volunteers to serve their colleagues and develop their organizational skills.
- Assisting students in understanding and following up their study plans through the banner system.
- Following up the rates of defaulting students, guiding students with low averages, motivating them, and alerting them to the procedures followed in this regard.
- Alerting the student of the penalties to which he is exposed, which may reach the final dismissal from the university if he violates any of the university student's behaviors, whether inside lecture halls or the university campus and exposing him to dismissal as well if he tries to cheat in exams.
- Managing important issues and helping resolve student complaints.
- Submitting a special report for students at the end of each semester to the general academic advisor at the college, explaining the activities and guidance of the students and the schedule and minutes of academic advising meetings with students.

Academic advisor skills

The skills of an academic advisor are very important in guiding students and helping them achieve their academic and career goals. Here are some of the basic skills an academic advisor should have:

Ability to Communicate:	An academic advisor must be able to communicate effectively with students.
Active Listening:	An academic advisor should be able to carefully listen to students and understand their problems and needs.
Ability to Analyze and Evaluate:	An academic advisor should have the ability to analyze and evaluate students' academic performance, identify strengths and weaknesses, and provide the necessary support and guidance.
Academic Experience:	The academic advisor should have in-depth knowledge of the curriculum, academic procedures, and career guidance.
Ability to Plan and Organize:	An academic advisor should be able to plan and organize events and activities that promote students' academic and professional growth.
Positive Vision:	The academic advisor should have a positive outlook, optimism, and the ability to motivate students to achieve their goals.
Group Counseling Skill:	He should have the ability to provide advice and guidance to a group of students at the same time regarding common matters between them, such as educating students about college regulations and policies regarding study, university life, or other matters.

Programs offered by the academic advisor to students:

The academic advisor, in coordination with the college administration, offers some programs that help the student to excel academically and innovate, including:

1- **Innovation and Creativity Skills Development Program**

It can include a range of activities and initiatives aiming at developing their capabilities in this area such as:

- **Creative Workshops:** Student-oriented workshops aiming at teaching them creative thinking techniques and motivating them to find new solutions to problems. These workshops can include group work and practical applications to stimulate creativity.
- **Innovation Challenges:** Innovation challenges can be launched for students where they are guided to solve a problem or develop an innovative idea in a specific field. This approach requires encouraging students to think creatively and apply their design and innovation skills.
- **Applied Projects:** Innovation and creativity skills can be enhanced by involving students in applied projects. A project is identified as one that requires innovation and creativity and enables students to apply their knowledge and skills to solve a problem or achieve the set goal.

2- **Study Group Program: The** study groups app is a useful tool to help struggling students in their studies. The program aims at forming small groups of students who face similar difficulties in certain courses, or even similar problems to exchange knowledge and mutual assistance, and students are met periodically every week or every other week. These groups work on:

- Improving social interaction.
- Providing mutual assistance.
- Promoting deep understanding.
- Increasing students' self-confidence.

Aids to the academic advisor in the academic advising process.

- Forms and questionnaires in which the academic advisor collects students' data, studies their academic and psychological condition or discovers their talents and identifies their needs through them.
- Lecture halls where meetings can be held with students.
- The university's external library, where students can meet in an open space that encourages communication.

Second: College

Study plans for each major are issued and academic advisors are assigned to students by the college, and the number of advisors and students accepted in each major is determined. Each college has its system regarding its academic programs, certificates, and evaluation system.

Course Registration Policy

- After paying the assigned fees for each student, the student goes to the academic advisor specified for him to choose the courses he wishes to register in each semester, provided that the registration process takes place on the dates specified according to the announced university calendar. It is not permissible to attend the study until after the completion of registration, and any change in registration should take place in the drop/add period.

When registering, the following should be considered:

- The minimum registration is 12 hours except for graduation cases only.
- It is not permissible to register in any course until after passing the previous requirement.
- It is not allowed to register in courses with a conflict in the academic schedule.
- New students should register in the English language courses (ENGL 101) and (ENGL 102) and pass them during the first and second years of their studies, and it is not permissible to withdraw from these courses except in cases approved by the competent dean of the college.
- Registration is available to students via the Internet (banner system), except for students with a cumulative GPA of less than (2.00), whose courses must be registered through the academic advisor in their colleges.
- Each student must personally register the courses that he will study each semester on the banner website at the times specified according to the university calendar. It is not permissible to attend the study until after the end of the registration process, and the student is not allowed to register late except with the approval of the Dean of the College and the President of the University, provided that the delay period does not exceed one week from the end of the registration period. This is in addition to the need to choose courses and the number of hours in agreement with the academic advisor.
- After completing the registration procedures, the student may drop or add to his credit hours one or more subjects, if this is during the periods specified for drop and add in each

semester following the rules governing this, taking into account the minimum and maximum academic load (so that it is not less than 12 credit hours and not more than 24 credit hours).

- After registration, the student may withdraw from one or more courses in any semester without being considered a failure in this course if he submits a withdrawal request within the permitted period announced in the academic calendar for each semester, subject to the approval of the academic advisor, and the number of academic hours registered after the withdrawal process is not less than 12 credit hours.
- Whoever withdraws after the assigned period of withdrawal or without the approval of the academic advisor is considered a failure unless he submits a compelling excuse accepted by both the academic advisor and the dean of the college and approved by the Vice President for Education and Student Affairs.

Deprivation, absence, and excuses policy

- The student is considered regular if the attendance rate of lectures and practical lessons is 75% or more and he is deprived of entering the final exams in any course (after making sure that a warning is sent to the student with a 25% absence) if his attendance rate is less than 75% of the lectures and practical lessons during the semester. This is done by a decision of the College Council or whoever authorizes him and assigns him an estimate (deprived).
- If the student is absent from any of the specified tests during the semester, he has the right to submit a medical excuse from the Medical Excuses Committee at Suad Kafafi University Hospital. It must be submitted within 48 hours before or after the exam. Also. for a social excuse in the event of a first-degree death only (parents - brothers - children - husband or wife).

Excuses are rejected in these cases:

- Excuses provided by police reports.
- Death excuses for relatives other than the first degree.
- Excuses provided by hospitals other than Souad Kafafi University Hospital.

Course Postponement Policy (Incomplete)

- **The student is allowed to postpone the completion of a course, but with specific conditions and steps, which are:**
  - Providing an acceptable excuse.
  - Submitting the excuse to the college administration within 48 hours before or after the excuse.
  - The student must have a minimum of 60% of the grades of the year's work.
  - The request is approved by the Vice President for Education and Student Affairs no later than 48 hours after the approval of the Dean of the College.
  - It is allocated to the student (I) in the course transcript for the semester.
  - The supplementary exam is conducted in the first and second week at the latest of the next semester.
  - The student's result is changed by submitting an approved request from the college administration to the Vice President for Education and Student Affairs, accompanied by a copy of the form of the request to postpone the completion of the previously approved course, well before the end of the date of drop/add.

Failure and re-examination policy

- If the student fails any compulsory course in any semester, he must study the same, but if he fails an elective course, he can re-study it or study another optional course to complete the graduation requirements, after the approval of the academic advisor and the dean of the college.
- If the student fails to enter the exam with a compelling excuse accepted by the College Council, his absence is not counted as a failure, and he is allowed to postpone the completion of the exam and it is assigned to him “I". A student who is absent from the exam without an acceptable excuse is considered a failure with a grade of "F".
- If the exam in one of the courses includes a written exam and another oral or practical one, the absent student from the written exam is considered absent in the course exam and no grades are assigned to him.

Warning and dismissal policy

- The student is warned if he obtains a cumulative average of less than (2) in any semester, and if he cannot raise his cumulative average to (2) in the period determined by the academic advisor after the approval of the Dean of the College, the second warning is given, and he is

dismissed from the university if his cumulative average does not rise to more than (2) in the semester following the second warning. In this case, the College Council has the right to grant a third chance, then study his case after that, or transfer his course if he wishes to do so.

Transfer of Enrollment between Colleges Policy

- It is not permissible to consider transferring first-year students between the corresponding colleges unless the student has the minimum total determined by the Supreme Council of Private Universities in high school.
- For students of other years, the student may be transferred from a college to its counterpart in the same university or another university with the approval of the Council of the two specialized colleges.
- The transferring applicant must submit his application before the beginning of the study in the college to which he wishes to transfer, and the College Council may, when necessary, accept the transfer after this date.
- The student's enrollment may be transferred from one college to another corresponding college in the same university by a decision of the Council of the two colleges, provided that the percentage obtained in high school meets the conditions eligible for admission to the college and has the total accepted by the college in that year.
- An equation is made for the courses that he studied in the corresponding college from which he is transferred, provided that the number of equivalent credit hours does not exceed 50% of the number of credit hours required for graduation.
- The University Council sets the rules governing the transfer of students and the transfer of their enrollment. In all cases, a decision shall be issued by the President of the University or his deputies approving the transfer or transfer of registration.

Registration Rules

Rule I

The minimum registration for the semester is 12 credit hours **except** (transferring from one stage to another - graduation).

Rule II

For students with a cumulative GPA below 2, they are allowed to register for the minimum credit hours only (12 credit hours) until they raise their cumulative GPA. If a

student with a cumulative GPA below 2 wishes to register for fewer than 12 credit hours, they will be financially charged according to the hourly rate, as per the financial regulations, provided that registration is done through the academic advisor.

Rule III

For students with a cumulative average ranging from (2) to less than (2.5), they are allowed to register the available hours according to the study plan for each college, while not allowing the registration of more hours than available until the cumulative average is raised.

Rule IV

For students with a cumulative average ranging from (2.5) to less than (3), they are allowed to register within (3) credit hours in addition to the number of allowed hours, and the student pays the prescribed fees for the excess hours, not exceeding (21) credit hours and in a manner that does not conflict with the academic regulations of the university colleges.

Rule V

Students are allowed to register (4) credit hours in addition to the number of hours allowed and pay the prescribed fees and not exceeding (24) credit hours in the following cases:

1- Graduation cases.
2- Students with a cumulative GPA of (3) or more.
3- Transferring from one stage of study to another (according to the regulations of each college).

Rule VI

In all the previous cases, it is required that there is no conflict in the study schedule.

Rule VII

Manual registration is not allowed at all, and only electronic registration is allowed online after the approval of the academic advisor to register during the prescribed period for registration.

Central Library at Misr University for Science and Technology

About the Library

The Central Library of Misr University for Science and Technology (MUST) was established by Presidential Decree No. 245 of 1996 in accordance with Law No. 101 of 1992 regulating the establishment of private universities, since the university is a member of the Union of Arab Universities and the Association of African Universities.

The library opens its doors from 9 AM to 5 PM on weekdays, except Thursdays from 9 AM to 3 PM, to provide maximum time for students and researchers. It includes bibliographic information services, internal and external circulation, reference services, and electronic document delivery. It also facilitates accessing information through the digital library, MUST digital archive, research repository MDAR, and the Egyptian Knowledge Bank EKB. The library services are made available for internal and external researchers.

Apart from its general collection of books and references, the library contains specialized references in medical, biological, engineering, media, languages and literature, archeology, and information technology fields. In addition, other references are available to encompass all of the scientific majors taught at the university colleges in order to provide support across the scientific, cultural and creative fields via searching the library digital catalogue available on: http://mustopac.must.edu.eg/

As for the community service and environment development sector, the library provides good training opportunities for students specializing in library science and information technology to ensure continuous development through joint efforts between academics and librarians.

Traditional Services

Internal Reading Hall

Located in the Main Hall, it enjoys appropriate space, lighting, healthy and efficient ventilation, besides being equipped with convenient chairs, reading tables, and shelves for all information resources in the hall. Moreover, the library hall is well soundproofed.

It is noteworthy that MUST Central Library welcomes numerous researchers unaffiliated with the university whom we provide with various services, including photocopying, internal reading and referential services, as the Main Hall includes about 66,000 books ranging between specialized books and general culture books. The number of copies available for each book varies between one, two or more.

The library maintains hundreds of books, theses and specialized references in all fields, whether medical, engineering, scientific, or humanities, which serve all the university colleges, not to mention the cultural, literary and religious books.

Reference Service

This service consists of answering questions and inquiries the visitors raise to obtain specific information, facts, data, or information relevant to distinctive topics through the assistance of the reference section and researchers' services in the library.

Ciculation Service

The service is provided manually and automatically, and allows researchers, employees and students to borrow in accordance with the borrowing regulations of the library.

Photocopying Service

The photocopying service complements the circulation service as it represents an alternative for many resources that are not for borrowing, such as periodicals and reference books.

Guided Tours

The library holds guided tours at the beginning of each semester for the library visitors of the university community in both the library and the university faculties to introduce and make the library patrons community aware of its services and holdings.

Training

The library provides training courses for undergraduates and graduates of Libraries and Information Departments to be familiar with the library work during the mid- and end-of-year vacation.

Workshops

The library holds workshops inside or outside the library building for the university affiliated and unaffiliated students and researchers to develop their research skills and to educate them on how to deal with databases and E-Learning platforms.

Digital Services

Database Services

The Central Library provides database services, being a member of the Egyptian Knowledge Bank (EKB), through which databases are accessible free of charge for researchers within Misr University for Science and Technology. It also provides a special account for non-Egyptians to enter the researchers' portal at the Egyptian Knowledge Bank (EKB).

https://www.ekb.eg/ar/home

Digital Institutional Repository

MDAR is an online database for collecting, preserving and publishing the intellectual production of researchers with the aim of free accessibility to scientific theses, dissertations, research works, periodical articles, university seminars and conferences.

http://dspace.must.edu.eg

Digital Scanning

The digital library digitizes the books and periodicals of the Central Library, making them available internally on an electronic platform in the Central Library in accordance with intellectual property rights as a long-term preservation plan.

Educational Platforms

The digital library provides access to databases, mainly **EBSCO**, **Elsevier**, and **Mc Graw-hill**, through the e-learning platform, which can be accessed through the following link:

https://smartlearning.must.edu.eg

Library Website

The website was established in December 2019, presenting the latest library news, services and seminars. It provides access to the bibliographic database - **Online Catalog-MUST OPAC** - which includes all the library books, references, periodicals and scientific theses. Furthermore, the website offers an auto-reply service to inquiries via Chatbot.

http://library.must.edu.eg/

Scientific Integrity Check

The digital library provides a scientific integrity check service using the iThenticate program to detect plagiarism, verify the research authenticity and protect intellectual property rights. It is available to students and faculty members inside and outside the university.

Current Awareness Services

This service provides regular updates on the items added to the library's collection, the latest available services and library news on a display screen at the Central Library entrance and on social media pages.

https://www.facebook.com/MUSTCentralLibrary

Document Delivery Services

The Central Library provides a document supply service to obtain electronic or printed materials of non-included items in the Central library's holdings. An electronic form is available to measure the library patron satisfaction level with the service to implement the necessary improvements.

https://docs.google.com/forms/d/e/1FAIpQLSeaozAtuE01uBBytvipd9QICGGxN_DZFZH6zR_D6t5RoAZhEw/viewform

Selective Dissemination of Information

This service is tailored for each patron to meet their individual needs by matching the available resources with the interests of the patrons that inherently define their needs from the library. This service is provided by filling out an electronic form on the library website.

https://docs.google.com/forms/d/e/1FAIpQLSdlnackVnXxQFhjSEHGxLGhi1YdN4JwZPbdIm-vIRj0j63C6w/viewform

Library Patrons Registration form

- **The Main Hall:** The electronic registration form, activated at the beginning of the academic year 2018-2019, is utilized to register students, faculty members and library visitors. Additionally, it allows report extraction on the library's visitor numbers.

- **The Digital Library:** The electronic registration form, activated at the beginning of the academic year 2022, is utilized to register students, faculty members and library visitors. Additionally, it allows report extraction on the library's visitor numbers.

Library Activities for Internal and External Patrons

Community Service and Environmental Development

- The library organizes / joins communal activities, such as Garage Sales.
- Participating in medical convoys through the mobile library

Cultural Activities

- Planning the Reading Club events
- You may join the Reading Club group by scanning the following QR code below:

- Arranging cultural seminars
- Holding bookfairs on the periphery of cultural seminars, heritage-related celebrations, and Arabic language events at the university

Scientific Research Activities:

- Taking part in the Scientific Day for the college of pharmacy students

Working Hours

Central Library Hours:

Saturday to Wednesday	Thursday	Friday
9:00 AM – 5:00 PM	9:00 AM – 3:00 PM	closed

Complaints and Suggestions Policy

- For inquiries and suggestions, kindly contact the designated department directors via the following email: mustlibrary@must.edu.eg OR by scanning the QR Code:

- You may also make any inquiries or complaints at the Information Desk of the Central Library.

- For complaints, contact the Library General Administration through the following email: Library.complaints@must.edu.eg

School of Continuing Education and Executive Programs "SCEEP"

The School of Continuing Education and Executive Programs at Misr University for Science and Technology aims to meet the needs of students and professionals in developing their skills and increasing their knowledge in various fields. Among the main objectives of these programs:

Skills and Knowledge Development: Providing opportunities to learn new skills and develop knowledge in specific areas to help individuals achieve their personal and professional goals.

Enhancing Employment and Career Opportunities: Providing programs that help students and professionals enhance job opportunities and advance in their careers.

Meeting Market Needs: Developing professional programs that align with the changing needs of the labor market and providing students with the skills sought by employers.

Promoting Lifelong Learning: Encouraging individuals to continue learning and developing their skills throughout their professional and personal lives.

Enhancing Interaction with the Community: Providing opportunities for interaction with industry and the local community through continuous education and professional training programs.

Distinct Teaching Methodologies

First: Proposed Programs

The proposed programs ensure the preparation of trainees capable of leadership in their professional lives through distinguished studies that simulate business and market requirements for excellence in specific specializations, acquiring strategic skills and experiences to solve the most challenging problems. They also include interactive educational programs designed to encourage interaction with peers in the same profession in the form of workshops for collaboration, learning, and networking with experienced group members.

Second: Unprecedented Responsibilities and Communication Opportunities with Executive Experts

This is to build their knowledge and strengthen their networks, establishing relationships that enrich their personal and professional lives, helping them to develop professionally in career field.

Third: Support for Outstanding Researchers

Through research centers with the best faculty members at the university, to achieve the vision of higher education to support pioneering research in specific specializations to benefit from this wealth of expertise.

Fourth: Practical Application-Based Learning

Equipping participants to return to their institutions ready to apply what they have learned so that many of them hold high leadership positions, launch new products and projects, and implement improvements in the field of work.

Fifth: Alumni Networks

Providing the graduates with suitable qualifying programs that keep them in contact with their university and help them obtain lifelong learning opportunities.

Student Support at Misr University for Science and Technology

Misr University for Science and Technology provides an integrated system of services and support to students through:

Financial Support for Students

The university provides financial support for students in various ways:

- 10% discount for sibling students.
- 15-25% discount for children of employees.
- 10% discount for students who excel athletically.
- Full scholarships.
- Tuition fees in installments.

Psychological Care for Students

The Psychological Counseling Unit at the university provides advice to students to overcome the problems they face at the scientific and academic levels as well as social and behavioral guidance for all students to develop their attitudes and skill needs and develop their mental health and their scientific and practical capabilities to reach the acceptable and approved educational level.

Healthcare

The university provides support to students through the work of health insurance that covers all medical services and includes many hospitals, laboratories, and pharmacies.

Providing university housing

The university provides a university housing service for female students and students enrolled in the university colleges.

- It consists of (2) female students housing with a total number of (202) beds.
- In addition to (2) student housing with a total number of (50) beds.

Sports and Social Activities

Your college allows you to participate in any of the activities provided by the university that are consistent with your hobby or talent, and these activities include:

Sport Activities

The available facilities for practicing sports are:

A sickle football court, a hexagonal one, one multi-use court (handball, basketball, and volleyball), and a free-standing squash court, in addition to an outdoor tennis court complex that includes 4 equipped courts. A sports supervisor in each college is assigned in line with the policy of stimulating sports activities and encouraging the largest number of university students to practice various sports activities.

Social activities

The Department of Social Student Activities represents the second part of the main student activities at the university and includes acting, music, choir, singing, roving, guides, and chess, as well as there is the second part of social activities, which is represented in various cultural activities such as cultural and religious competitions (Prophet's Birthday competitions, memorizing the Holy Quran and seasonal religious competitions) in addition to short story competitions, in coordination with the Faculty of Languages and Translation. Sculpture, plastic arts, and photography. The Department also organizes theatrical performances for the cast under the supervision of a specialized and academic trainer, as well as the Department organizes singing and choir concerts under the supervision of a specialized and academic trainer and organizes several camps for scouts under the supervision of a specialized and academic trainer.

This is in addition to organizing cultural courses on important and national occasions, as for trips and their activity, the university supervises the organization, arrangement, and identification of places for various cultural, scientific, and recreational trips.

Food and cafeteria area

The university has a special area for restaurants and cafeterias dedicated to all university students.

Book an Appointment with Your Academic Advisor.

The appointment booking system with your academic advisor at the university is one of the modern tools proposed by the General Academic Advising Center that contributes to facilitating and organizing academic guidance processes for students. This system provides an opportunity for students to schedule one-on-one meetings with their academic advisors to discuss their academic developments and benefit from personal advising. It allows students to choose the time that suits them best, which promotes effective interaction between students and their advisors.

With this system, students can avoid the complications of wasting time waiting for their turn, as they can access the academic advisor's schedule and choose the appropriate period for them. This system promotes positive interaction between students and academic advisors, contributing to improving the quality of academic services and enhancing the student experience at the university.

To use this system, the student performs the following steps:

1- Scan the QRcode of the college in which he is enrolled.
2- A page appears with all college advisors.
3- The student chooses his advisor and then shows the dates available to the advisor.
4- The student chooses the day and time to meet the advisor.
5- Write your data (name - phone - email - reason for interview)
6- Then the last step is to press Book.

Student Tracking System

Following students at the university is vital to ensure that students with unique needs and skills are given the necessary support and attention. A special focus is placed on students with special needs, as the university dedicates significant efforts to providing infrastructure and individual support that ensures their integration into the academic environment.

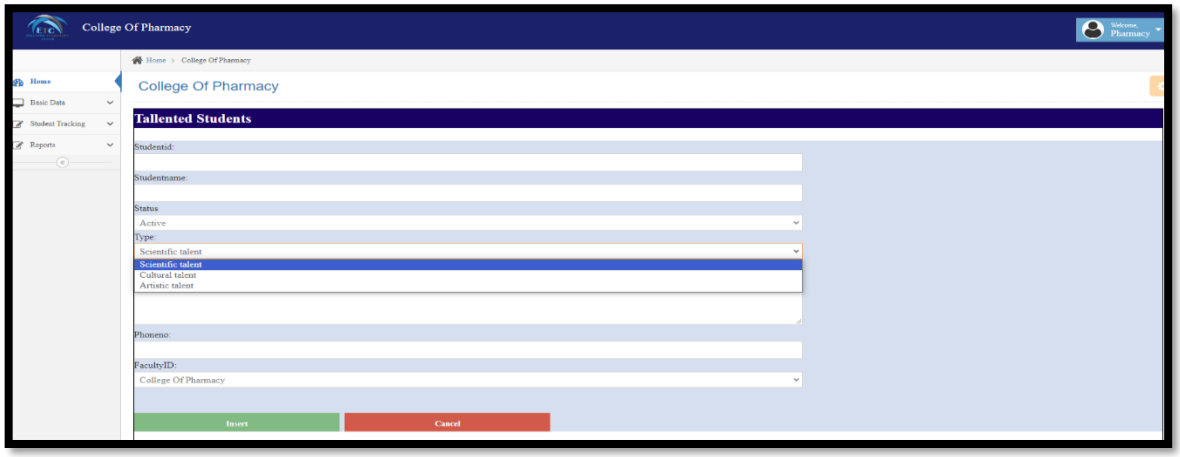
In addition, it encourages the activation and support of talented students and students who practice sports and participate in local and international competitions. A database dedicated to the registration of these students is created, allowing their progress and needs to be tracked periodically. Tailored support is provided to each of these students, whether they need assistive technology integration or additional guidance to develop their talents.

The initiatives also include efforts to facilitate coordination between artistic and athletic talent with their study paths, promoting continuous interaction with these students to ensure they get the most of their university experience. This approach reflects the University's commitment to providing an inclusive and supportive environment for all students, promoting academic success and personal development. Accordingly, the university has designed the Follow-up System database to record the data of these students through the academic advisor.

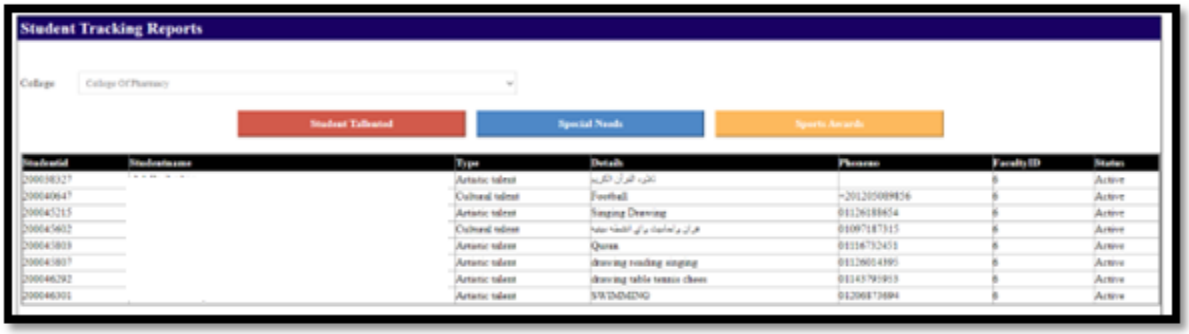
Here are some of the system's screen images:

1- **The screen for registering the data of students with special needs.**

2- **The screen for recording the data of students who have scientific, artistic and athletic talents.**



3- **The screen for extracting reports on the data of students with special needs and gifted people**



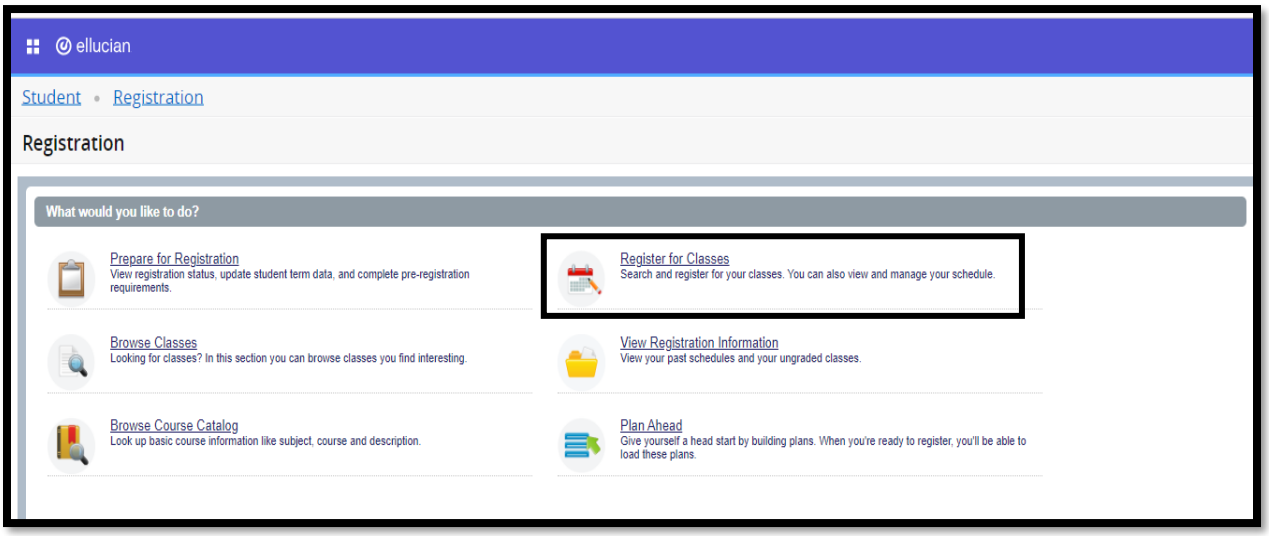
Electronic systems at the university (Smart learning, application Muster, Banner system)

First: Course registration system through Banner system

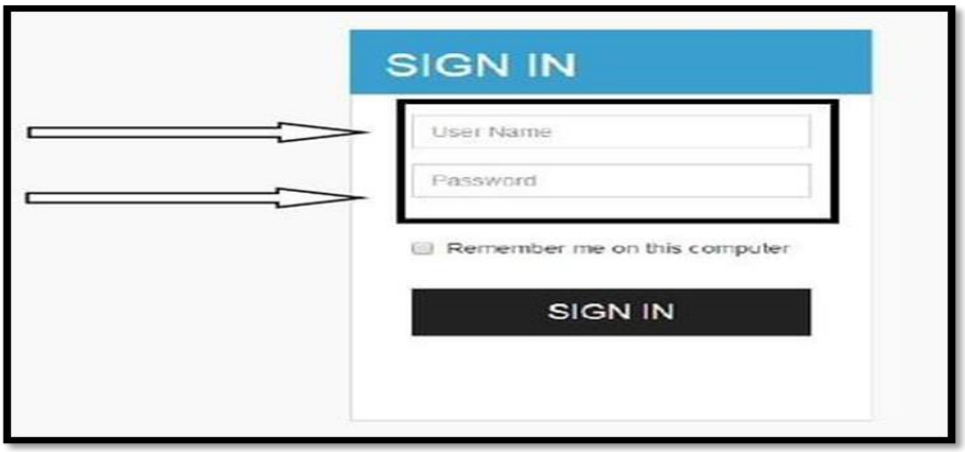
The university's student data and course registration system, known as the "Banner System", is a vital part of the higher education infrastructure. This system aims to facilitate and organize the process of registering students in courses and managing their academic information effectively. Here are some steps to follow when you want to register courses through the Banner system:

1- **Log in to the banner website [(https://bannerlinks.must.edu.eg/) and then (](https://bannerlinks.must.edu.eg/)Student self service), log in and then follow these steps:**

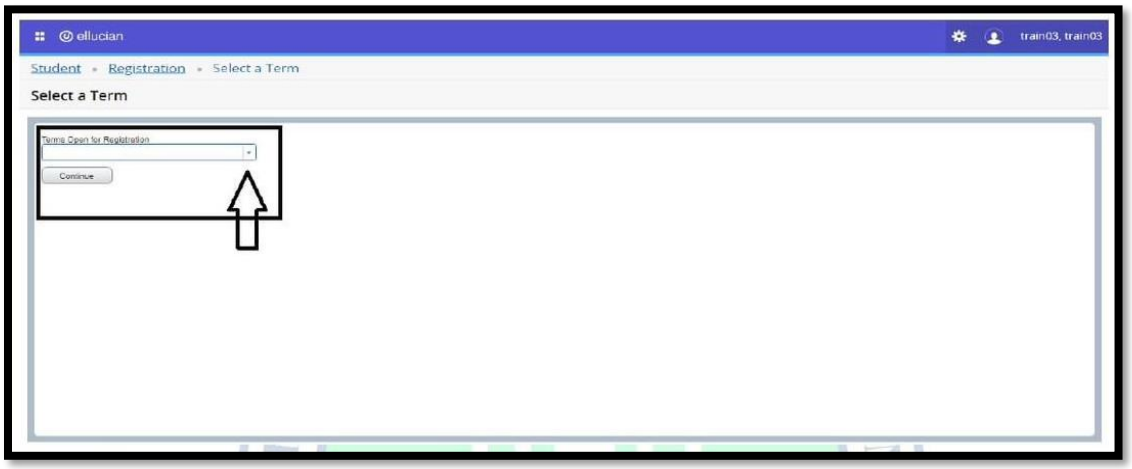
2- **Choose Register for classes**



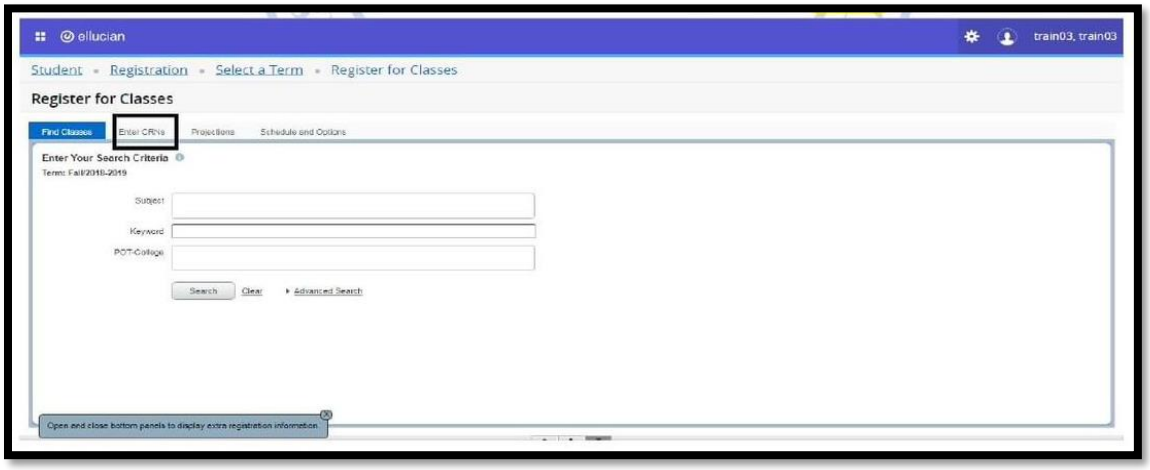
3- **Enter the university number then the password**



4- Select Semester

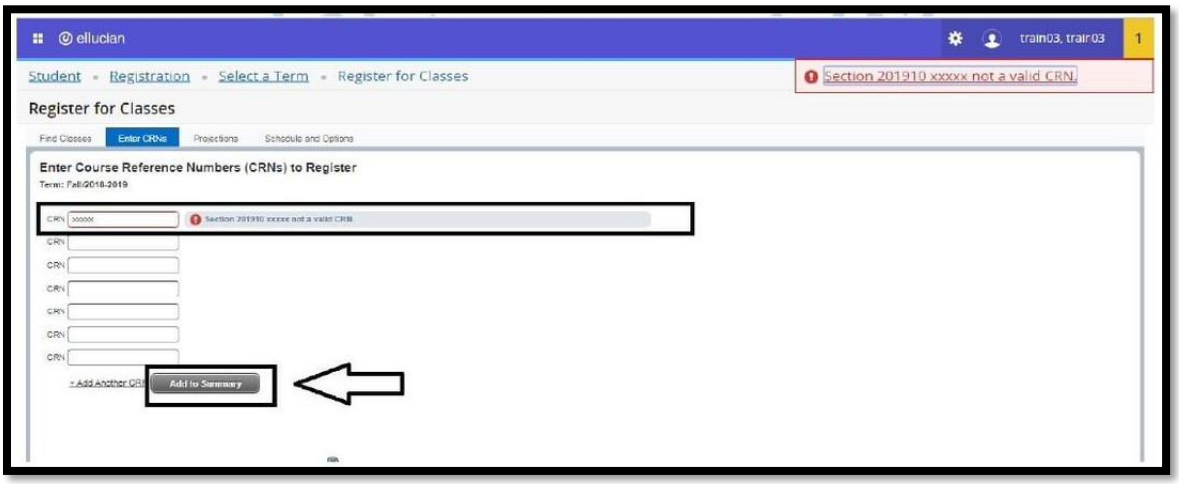


5- Choose the method you use for registration, which is CRN, and then type the CRN you want to register in

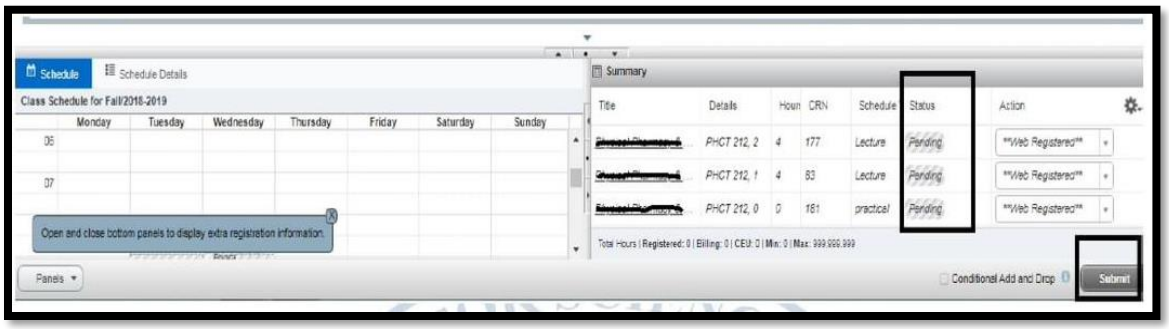


6- Repeat the previous step and all the courses available to you are registered

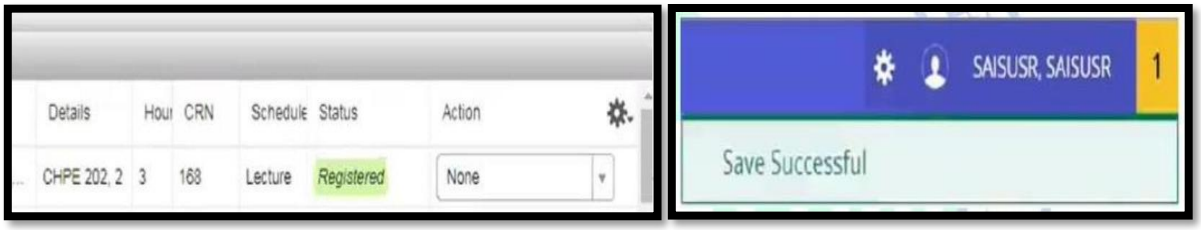
7- Click on the word **Add to summary.**



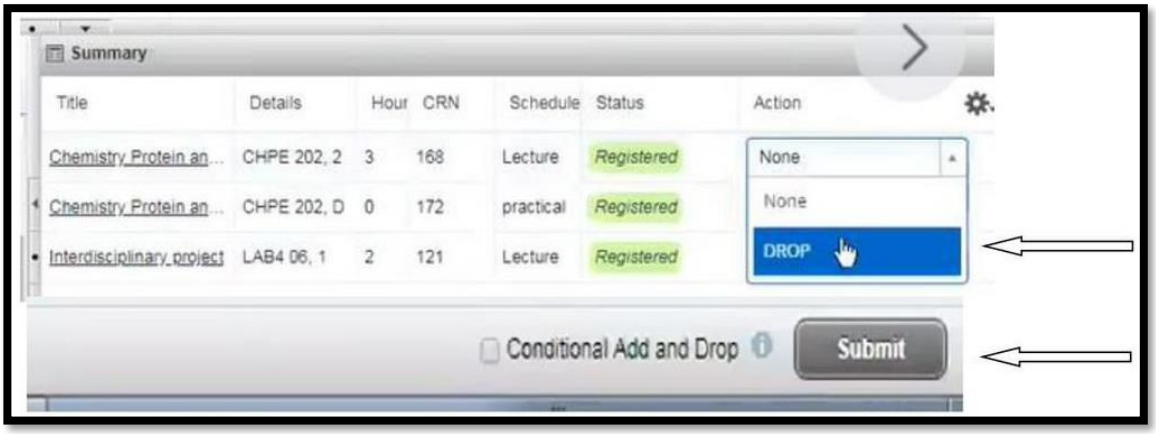
8- After entering **the CRN** for the courses to be registered so far, the pending courses are waiting, you must press the **Submit button** to complete the final registration



9- The 'Save' message appears successfully and the status is converted from **Pending** to **Registered** as in the image



10- If you want to delete any course, click on the arrow corresponding to the course you want to delete, then choose Drop**, then** press the Submit **button.**

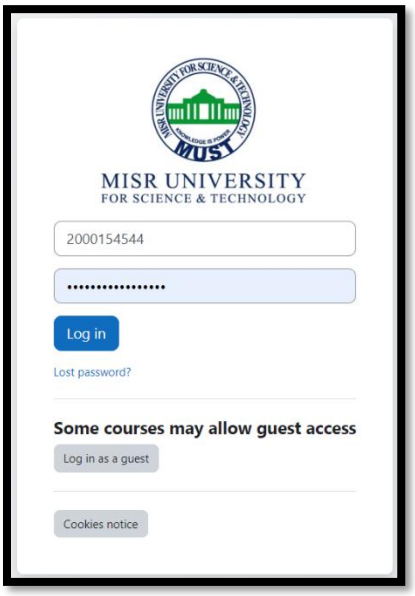


Second: E-Learning Platform Must E-Learning

The e-learning platform at the university is a modern and effective way to facilitate the learning process and achieve interaction between students and lecturers. This platform provides opportunities to access online course content, saving time and effort. It allows students to review lectures and lessons anytime, anywhere, enhancing flexibility in learning.

The platform also allows direct interaction between students and teachers through discussion forums and live chats, which contributes to the exchange of ideas and benefit from the experiences of others. In addition, the platform provides electronic assessment tools that help evaluate students' performance and provide immediate feedback.

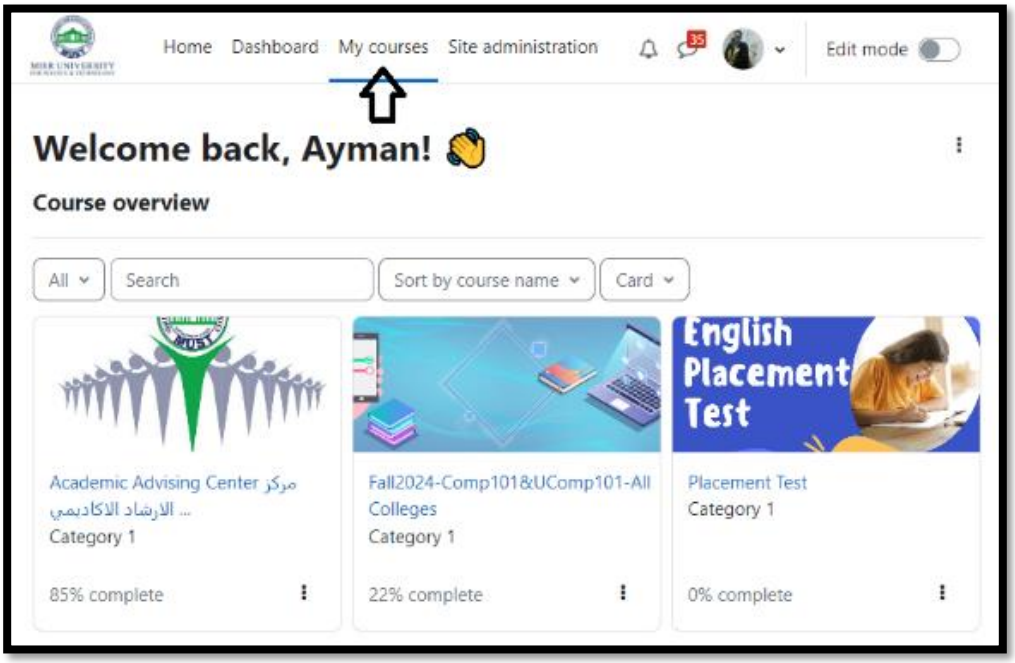
In general, e-learning platforms contribute to enhancing the learning experience and motivating students to actively participate in the educational process.



The following are the screenshots of how to use the e-learning platform:

1- After entering the e-learning platform (https://smartlearning.must.edu.eg/) The username is written which is the (ID) of the student and write the password.

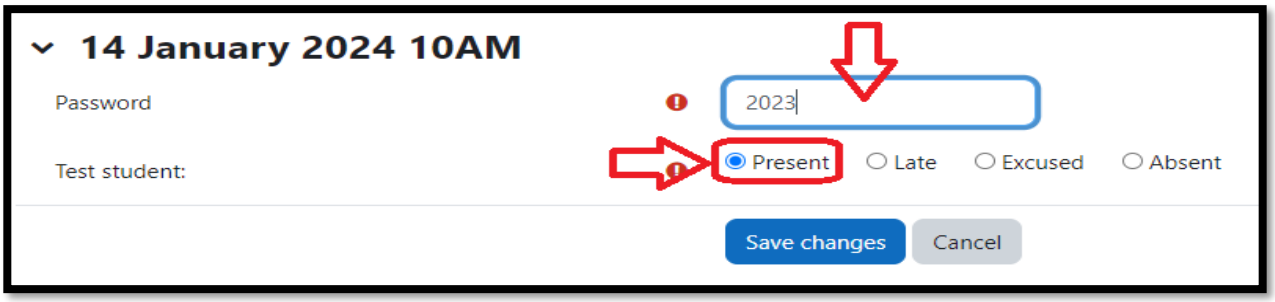
2- A screenshot showing the student's materials through the word (My Courses)



3- **Steps to register attendance through the e-learning platform.**

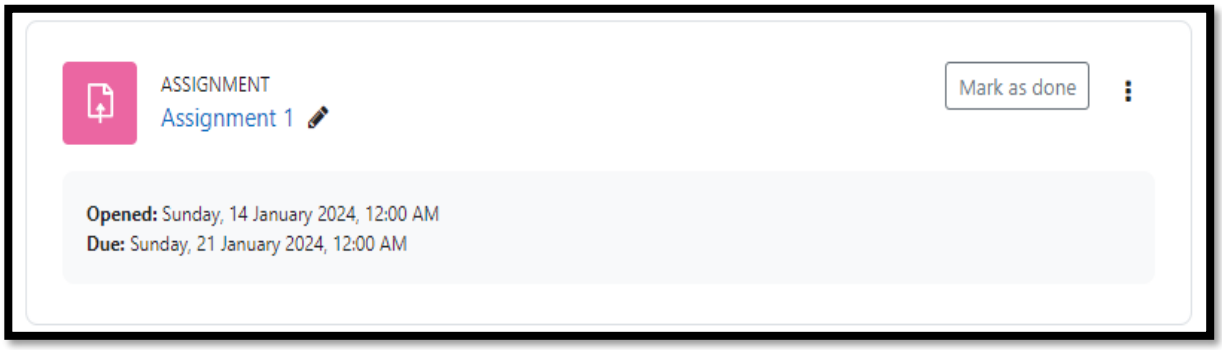
- **Click on 'Student Attendance' on the course page**

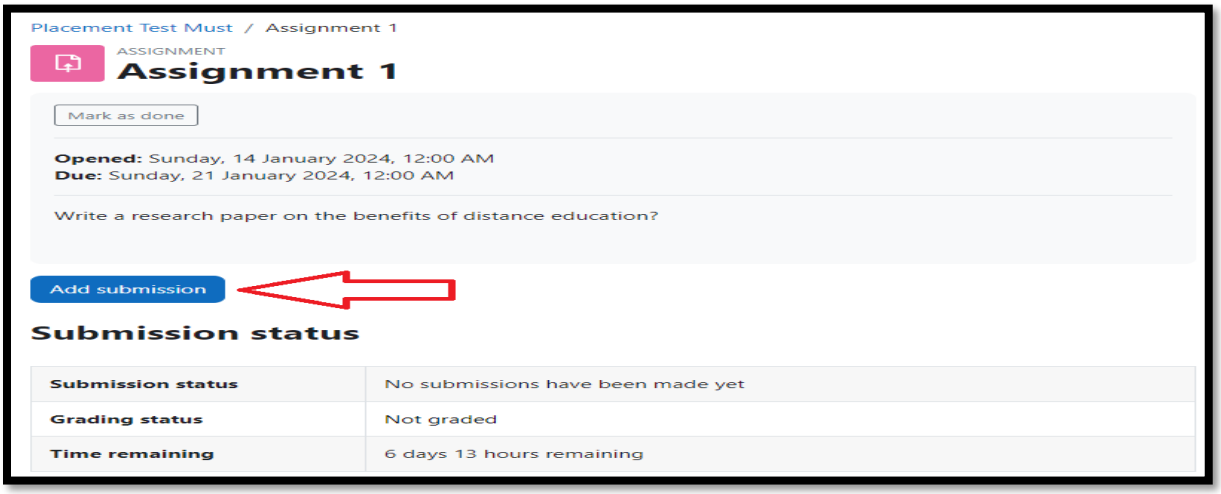
- **Enter the password specified by the course instructor.**



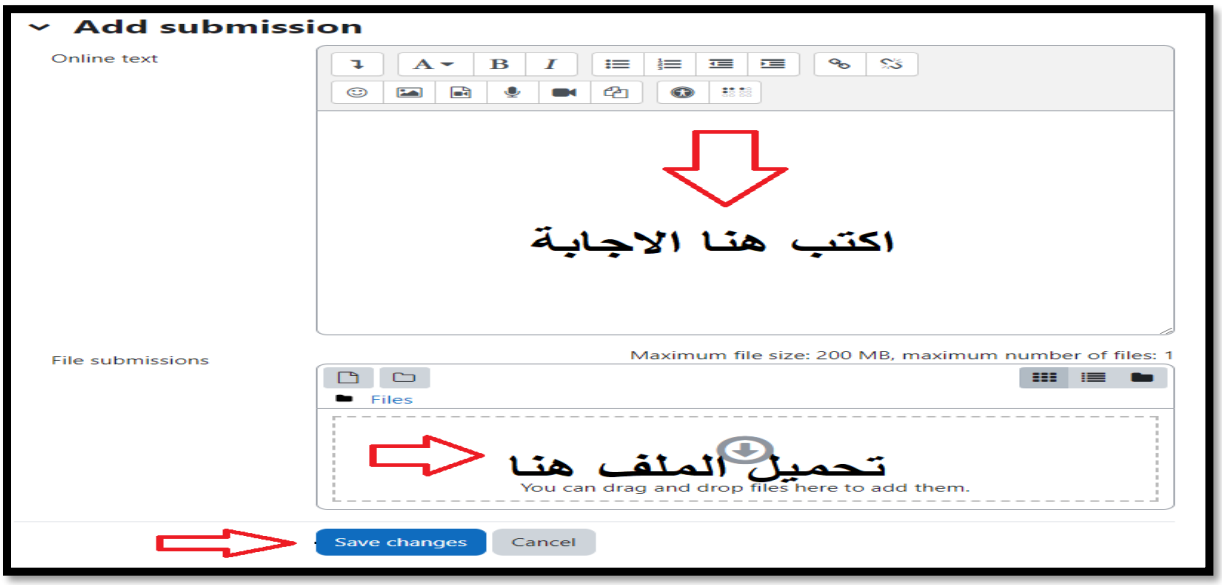
4- **Steps to submit assignments through the e-learning platform.**

- **Go to the course page, then to the assignment to be delivered, and follow the steps with the following pictures:**





- **You can upload a file or write your answer directly**



5- Steps to take an e-exam on the e-learning platform.

- **Go to the course page, then to the electronic exam, and follow these steps:**

Third: MUSTER Application

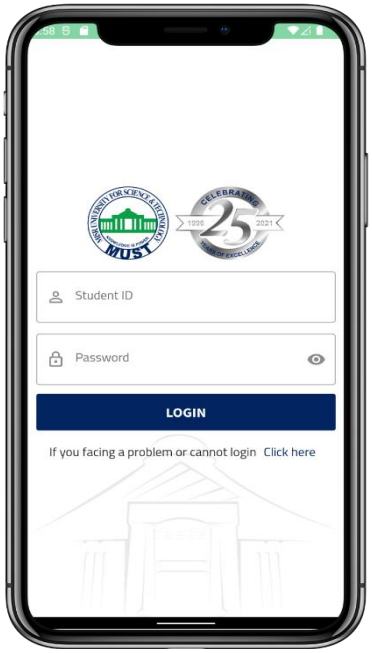
The "MUSTER" application is a unique tool that provides multiple services to students at the university, as it contributes to facilitating access to various university services via mobile phone. The app provides features that make it easier for students to access academic results instantly, promoting effective communication with academic matters.

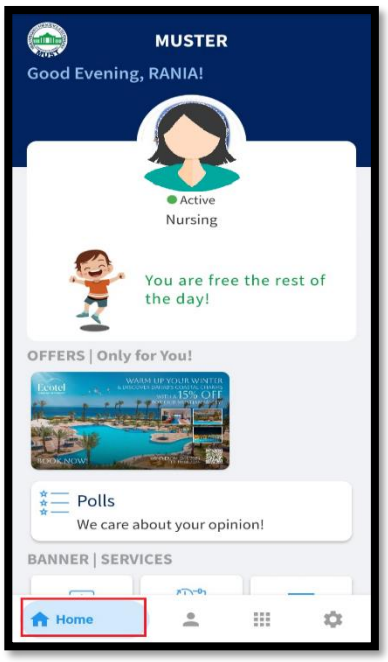
Thanks to MUSTER, students can view study schedules, which contributes to better organization of their time. The application also provides the ability to follow up exam dates and prepare for them, which enhances time awareness and good preparation for exams.

In addition, the app allows students to pay tuition fees electronically, providing an easy and secure way to manage their finances. Overall, Applichin is a modern and useful tool that enhances the student experience at the university and makes academic administration more effective.

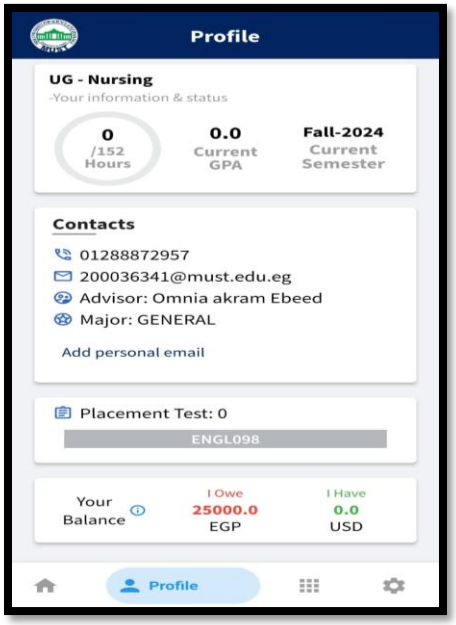
The following are the screenshots of the application to help you identify the services of the application:

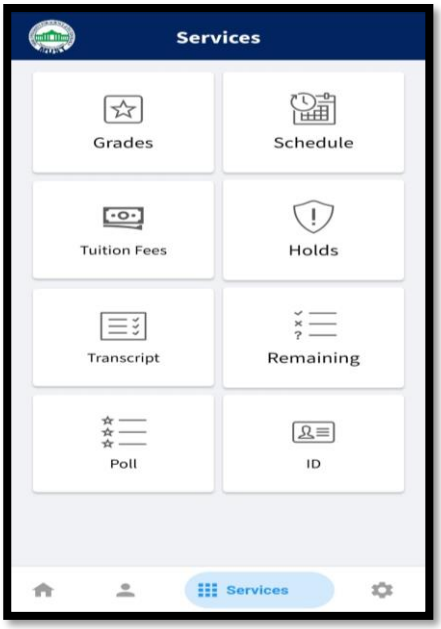
1- Login screen and home screen:



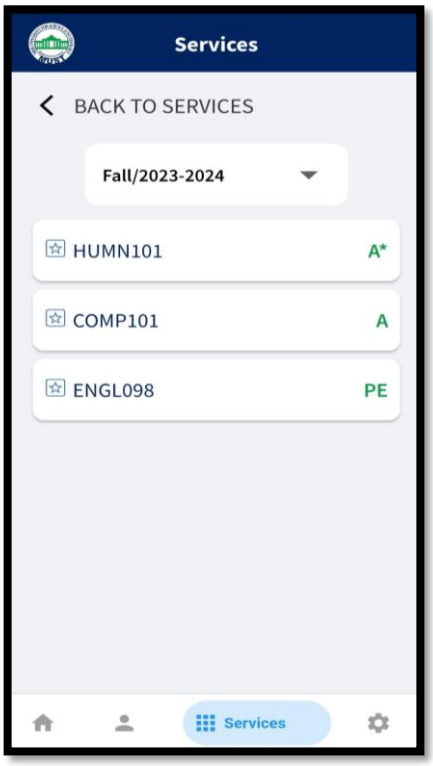


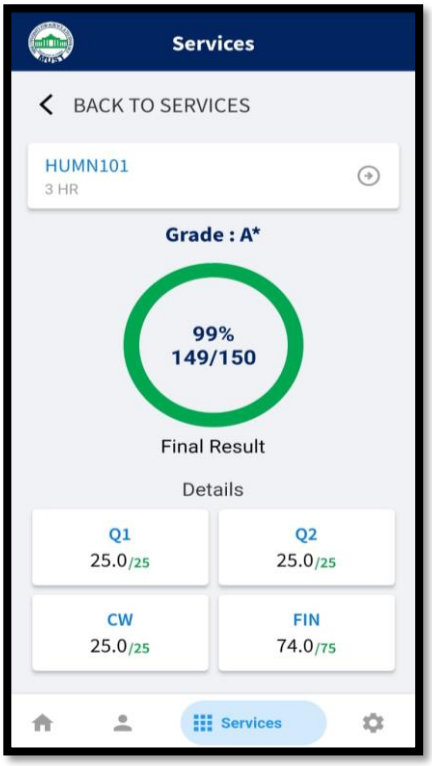
2- Student Profile screen and the screen for the services available on the application



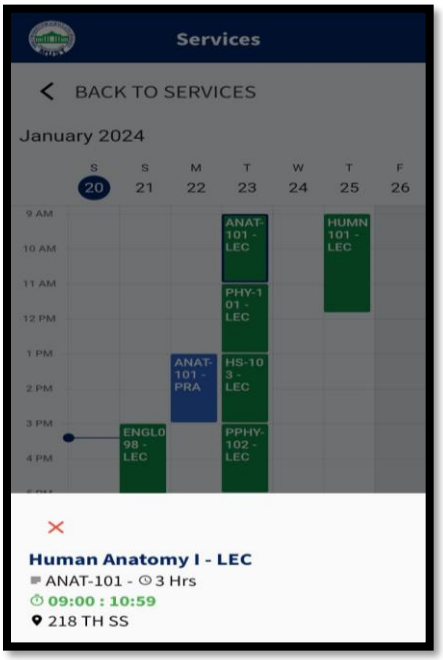


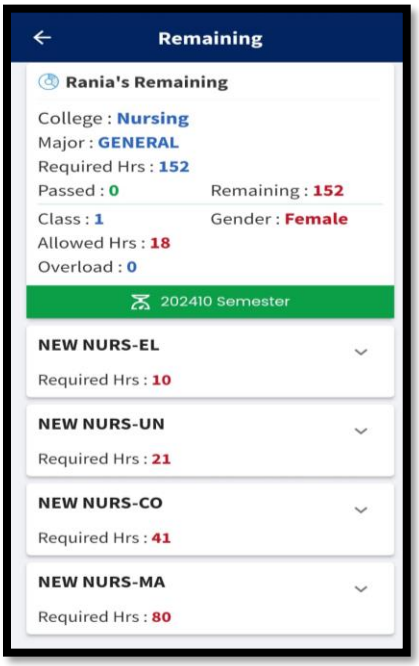
3- Screens for showing grades





4- The screen of the study schedule and the details of the student's hours





5- Screens for electronic payment service

Conclusion

At the conclusion of the Student Guide to Academic Advising, we wish you an inspiring and fruitful study journey. Educational attainment is not just about lessons and exams, it is rather a holistic experience that requires guidance and support. We hope this guide has given you a better understanding of the academic advising services available and how to benefit from them.

On your academic journey, don't hesitate to ask questions and seek help when needed. Our Academic Advising team is here to help you achieve your goals and overcome challenges. Take advantage of available resources and be an active part of the student community.

Remember that learning is not a single journey, but an experience that you share with your peers and professors. Enjoy your academic journey, gain skills and knowledge.

We wish you great success in your academic career and a life full of challenges and successes.
